10. Maintain safety level & improve efficiency in nuclear energy

- ▶ EU policy framework
- ▶ **The ETIP-SNET: a new platform addressing the energy system as a whole**
- ▶ Purpose of the workshop
- ▶ Agenda of the workshop

From a fragmented EU advisory to an integrated framework

A new focus on
innovation /
implementation and
on sector coupling

Main objective is to address the innovation challenges in **energy system** and **market evolution** necessary for achieving climate protection and **renewables integration** with affordability and security of supply ... beyond smart electricity grids (whole energy system)

ETIP SNET's mission

- ▶ **Set-out a vision for RD&I for Smart Networks for Energy Transition** and engage stakeholders in this vision.
- ▶ **Prepare and update the Strategic Research and Innovation Roadmap.**
- ▶ Report on the **implementation of RD&I activities at European, national/regional and industrial levels.**
- ▶ Provide **input to the SET Plan action 4** which addresses the technical challenges raised by the transformation of the energy system.
- ▶ **Identify innovation barriers**, notably related to regulation and financing.
- ▶ Develop enhanced knowledge-sharing mechanisms that **help bring RD&I results to deployment.**
- ▶ Prepare **consolidated stakeholder views** on Research and Innovation to European Energy Policy initiatives.

A new roadmap supported by workshops, public consultation and a monitoring exercise

The 10-year (2020-2029) ETIP SNET updated R&I roadmap specifying the future R&I needs for the energy system will be drafted based upon,

- consolidated and balanced stakeholder viewpoints through “regional” workshops
- consolidated and balanced stakeholder viewpoints through public consultation
- a monitoring/review of national, European and international R&I activities → assess the coverage of the R&I activities by national and European projects
